

PRIMA

Full Proposal Template

Administrative forms (Part I)

Title of Proposal: GeoSpatial and Artificial intelligence technologies: Innovative approach for water resources management

Acronym: **SAVE water**

1. Administrative data of participant organisations

Participant No *	PI name	Organisation	PIC NUMBER	Country
Coordinator	Salwa SAIDI	Faculty of Sciences of Tunis, University of Tunis El Manar (FST-UTM)	919844308	Tunisia
Partner 2	Imed Riadh FARAH	Manouba School of Engineering (MSE-UMA)	934232318	Tunisia
Partner 3	Abdes Samed BERNOUSSI	Faculty of Sciences and techniques, Tanger University of Abdelmalek Essaadi (FSTT)	951841504	Morocco
Partner 4	Imane SEBARI	Institute of Agronomy and Veterinary Medicine Hassan II(IAV)	998781744	Morocco
Partner 5	Larbi JABRI	University of Badji Mokhtar Annaba (UBMA)	937761566	Algeria
Partner 6	Basem ALJOUMANI	Technical University of Berlin (TU Berlin)	999986678	Germany
Partner 7	Pier Luigi Mazzeo	Institute of Applied Sciences and Intelligent Systems and –CNR (ISASI-CNR)	927678901	Italy
Partner 8	Maria Consilia Antonelli	Azienda Agricola Agrianto di Maria Consilia Antonelli (Agrianto)	944957123	Italy
Partner 9	Ali Gaber Mohamed Mahmoud	Faculty of Agriculture, Fayoum University (FOAFU)	932842017	Egypt
Partner 10	Simon	Research Center of international	999993565	France

	Taugourdeau	cooperation in Agronomic research for development (CIRAD)		
Partner 11	Pierre-Louis FRISON	Gustave Eiffel University (UGE)	897556521	France
Partner 12	Cristina Cruz	FCiências.ID - Association for Science Research and Development (FC.ID)	91505694	Portugal
Partner 13	María Rosa Mosquera Losada	Engineering Department of University of Santiago de Compostela (USC)	999829635	Spain

Associated partners (AP) will be involved from the beginning in a participatory approach. Some APs have provided support letters (see annex in part I: Ministry of agriculture, water resources and fishing from Tunisia, Agency of Hydraulic Basin (Agence du bassin Hydraulique) of Morocco, Moroccan committee Of International Association of Hydrogeologists (CM-AIH), Topo mapping office of Tunisia, URB office Tunisia, Tunisian Association of Geomatics (ATG), Acquedotto Pugliese spa, Italy, Agriculture Directorate in Fayoum, Egypt, Exceptronictech office, Tunis Tunisia, Department of Forestry Manouba-Tunisia, will be joined by others including experts in water resources management that will be invited at the project's start.

Ministry of agriculture, water resources and fishing from Tunisia

DECLARATION OF SUPPORT FROM THE COMPETENT AUTHORITY

Name and legal status: BEHIAF SAHBI (Technical Expert)

Full address: ministry of agriculture water resources and fishing

Fax:

E-mail: sahbi_ghi@hotmail.com

Contact Person (name and function): BEDHIAF SAHBI (Deputy Director)

Please specify whether, why and how you will support this project:

We wish to confirm our interest to actively participate in exchanges proposed in the frame of PRIMA call SAVE water project entitled "GeoSpatial and Artificial intelligence technologies: InnovatiVE approach for water resources management".

This project aims to develop an intelligent system capable of addressing the challenges facing the water sector. The project combines, in a relevant way, the search for effective innovation solutions and concrete local actions to ensure cooperation and propose management policies for water resources management.

We aim to support the project throughout its duration by contributing our expertise in water resources management within our field. We will contribute to disseminating the project's results through the networks it engages with and its communication channels.

We acknowledge and accept that our contributions will be provided in kind, meaning at no cost to the project, and we agree to be recognized as an Associated Partner in SAVE water PRIMA consortium.

Contact Person (name and function): Faika SAIDI: Architect and urban planner: studio manager

Please specify whether, why and how you will support this project:

We wish to confirm the interest of the Studio of Architecture and Urban Planning URB to actively participate in exchanges proposed in the frame of PRIMA call SAVE water project entitled "GeoSpatial and Artificial intelligence technologies: Innovative approach for water resources management".

The studio can contribute in PRIMA project by:

Helping the collect of data concerning the management of agricultural land and by the way the management of water resources.

Studying the evolution of transformation of agricultural land to urban land and the consequences on natural and water resources.

Draw up strategies of an optimal and sustainable management of water resources through the protection of agricultural land from transformations and degradation.

This project aims to develop an intelligent system capable of addressing the challenges facing the water sector. The project combines, in a relevant way, the search for effective innovation solutions and concrete local actions to ensure cooperation and propose management policies for water resources management.

We aim to support the project throughout its duration by contributing our expertise in water resources management within our field. We will contribute to disseminating the project's results through the networks it engages with and its communication channels.

We acknowledge and accept that our contributions will be provided in kind, meaning at no cost to the project, and we agree to be recognized as an Associated Partner in SAVE water PRIMA consortium.

Acquedotto Pugliese spa, Italy**DECLARATION OF SUPPORT FROM THE COMPETENT AUTHORITY**

Name and legal status: Acquedotto Pugliese spa

Full address: Via Cagnetti, 36 70121 BARI (ITALY)

E-mail: g.mazzolani@aqp.it

Contact Person (name and function): Gianfredi Mazzolani, Head of Research, Development and International Activities Department

Please specify whether, why and how you will support this project:

Acquedotto Pugliese SpA (also known as "AQP"), www.aqp.it, is one of Italy's largest and most prominent water utility companies, founded in 1919, serving the Apulia region in Southern Italy. With over a century of experience in water management, AQP is dedicated to providing high-quality water services, promoting sustainability, and integrating innovative technologies into its operations. AQP mission is to ensure the efficient, sustainable, and reliable supply of water and sanitation services to the Apulia region, enhancing the quality of life for its residents and contributing to environmental protection. The mission of AQP is to be leader in sustainable water management, leveraging advanced technologies and best practices to address the challenges of water scarcity and environmental sustainability.

We wish to confirm the interest of the Acquedotto Pugliese SpA to know the results obtained within the PRIMA call SAVE water project entitled "GeoSpatial and Artificial intelligence technologies: Innovative approach for water resources management".

This project aims to develop an intelligent system capable of addressing the challenges facing the water sector. The project combines, in a relevant way, the search for effective innovation solutions and concrete local actions to ensure cooperation and propose management policies for water resources management.

We are interested in knowing the results of the trial and using the results to compare them with other similar technologies for which we have had experience in order to assess the possibility of promoting their application.

2. General information on the pre-proposal

Section	Section 2
Call	PRIMA 2024
Topic	Thematic Area 1-Water management Topic 2.1.1 (RIA*) Effective water accounting approaches under crisis conditions : climate change and external shocks.
Type of Action	Research and Innovation action (RIA)
Duration in months	36
Free keywords	Mediterranean and European areas; artificial intelligence; remote sensing; climate change; stakeholders; sensors; models; Database; Vulnerability; Dashboard; gender equity; water decision support.
Abstract	Ensuring the increased different human water needs, in this context of climate change, constitutes a great challenge, especially in the Mediterranean area. In regions with a dry climate and overexploited water system, the situation is more complex and sustainable water management is imposed. In this process, the amount of data related to water management is growing. So, bringing new opportunities offered by Artificial Intelligence and Geospatial technologies can improve the efficiency of water management policies by processing data, optimizing water supply services, and gathering all stakeholders. This can constitute the overall objective of SAVE water project. Other specific objectives are: (i) Establishment of a water system database including the LL data gathering and already existent data adapted for Mediterranean area (ii) Development of an intelligent system based on real time monitoring Water systems and predictive models (iii) Model the impact of land use and climate changes on hydrological systems via models based remote sensing. (iv) Establishment of a local adapted vulnerability model for the prevention and the protection of highly risked water system (v) Analysis of the socio-economic and environment impacts and proposing of sustainable pricing and insurance strategies plan against water scarcity and external shocks (vi) Development of a collaborative platform involving all water system stakeholders using a participatory approach. (v) Exploit and out-scale SAVE water innovative approach via communication, dissemination and exploitation plans The SAVE water project is directly related to Topic 2.1.1 (RIA*) - Effective water accounting approaches under crisis conditions: climate change and external shocks. This initiative strengthens crisis management with early warning systems and resilience strategies, aiming to address complex water issues collaboratively for long-term sustainability. To achieve this objective, we will benefit from the rich experience of an interdisciplinary team from several Mediterranean and European countries (2 Tunisia, 2 Morocco, 1 Algeria, 1 Germany, 2 Italy, 1 Egypt, 2 France, 1 Portugal, 1 Spain) working in complementarity and in synergy ensuring to deliver solutions

	contributing to the objectives of water resource management in water scarce Mediterranean and EU regions.
--	---

Has this proposal (or a very similar one) been submitted in the past 2 years in response to a call for proposals under Horizon 2020, PRIMA or any other EU programme(s)?

Yes ☒

No ☐

Declarations

1) The coordinator declares to have the explicit consent of all applicants on their participation and on the content of this proposal.	Yes
2) The information contained in this proposal is correct and complete.	Yes
3) This proposal complies with ethical principles (including the highest standards of research integrity — as set out, for instance, in the European Code of Conduct for Research Integrity — and including, in particular, avoiding fabrication, falsification, plagiarism or other research misconduct).	Yes

The coordinator confirms:

- to have carried out the self-check of the financial capacity of the organisation on http://ec.europa.eu/research/participants/portal/desktop/en/organisations/lfv.html or to be covered by a financial viability check in an EU project for the last closed financial year. Where the result was “weak” or “insufficient”, the coordinator confirms being aware of the measures that may be imposed in accordance with the H2020 Grants Manual (Chapter on Financial capacity check); or	Yes
- is exempt from the financial capacity check being a public body including international organisations, higher or secondary education establishment or a legal entity, whose viability is guaranteed by a Member State or associated country, as defined in the H2020 Grants Manual (Chapter on Financial capacity check); or	Yes

The coordinator hereby declares that each applicant has confirmed:

- they are fully eligible in accordance with the criteria set out in the specific call for proposals; and	Yes
- they have the financial and operational capacity to carry out the proposed action.	Yes
The coordinator is only responsible for the correctness of the information relating to his/her own organisation. Each applicant remains responsible for the correctness of the information related to him/her and declared above. Where the proposal is to be retained for EU funding, the coordinator and each beneficiary applicant will be required to present a formal	

declaration in this respect.

According to Article 131 of the Financial Regulation of 25 October 2012 on the financial rules applicable to the general budget of the Union (Official Journal L 298 of 26.10.2012, p. 1) and Article 145 of its Rules of Application (Official Journal L 362, 31.12.2012, p.1) applicants found guilty of misrepresentation may be subject to administrative and financial penalties under certain conditions.

Personal data protection

The assessment of your grant application will involve the collection and processing of personal data (such as your name, address and CV) on the French National Research Agency evaluation and submission system. The PRIMA Foundation informs that in accordance with the French law "Informatique et Libertés" of the 6 of January 1978 as amended, applicants have the right to access and rectify their personal information. As such, they can access their user profile and rectify themselves some information about them. In addition, they have the right to exercise their rights by seizing the "Correspondant informatique et libertés" of the ANR. Unless indicated otherwise, your replies to the questions in this form and any personal data requested are required to assess your grant application in accordance with the specifications of the call for proposals and will be processed solely for that purpose.

3. Ethics issues table

1. HUMAN EMBRYOS/FOETUSES	YES	NO	PAGE
Does your research involve Human Embryonic Stem Cells (hESCs)?		X	
Will they be directly derived from embryos within this project?		X	
Are they previously established cells lines?		X	
Does your research involve the use of human embryos?		X	
Will the research lead to their destruction?		X	
Does your research involve the use of human foetal tissues / cells?		X	
2. HUMANS	YES	NO	PAGE
Does your research involve human participants?		X	
Are they volunteers for social or human sciences research?		X	
Are they persons unable to give informed consent?		X	
Are they vulnerable individuals or groups?		X	
Are they children/minors?		X	

Are they patients?		X	
Are they healthy volunteers for medical studies?		X	
Does your research involve physical interventions on the study participants?		X	
Does it involve invasive techniques?		X	
Does it involve collection of biological samples?		X	
If your research involves processing of genetic information, see also section 4.		X	
3. HUMAN CELLS / TISSUES	YES	NO	PAGE
Does your research involve human cells or tissues (other than from Human Embryos/ Foetuses, i.e. section 1)?		X	
Are they available commercially?		X	
Are they obtained within this project?		X	
Are they obtained from another project, laboratory or institution?		X	
Are they obtained from biobank?		X	
4. PERSONAL DATA	YES	NO	PAGE
Does your research involve personal data collection and/or processing?		X	
Does it involve the collection and/or processing of sensitive personal data (e.g.: health, sexual lifestyle, ethnicity, political opinion, religious or philosophical conviction)?		X	
Does it involve processing of genetic information?		X	
Does it involve tracking or observation of participants?		X	
Does your research involve further processing of previously collected personal data (secondary use)?		X	
5. ANIMALS	YES	NO	PAGE
Does your research involve animals?		X	
Are they vertebrates?		X	
Are they non-human primates?		X	
Are they genetically modified?		X	

Are they cloned farm animals?		X	
Are they endangered species?		X	
Please indicate the species involved (Maximum number of characters allowed: 1000)			
6. THIRD COUNTRIES	YES	NO	PAGE
In case non-EU countries are involved, do the research related activities undertaken in these countries raise potential ethics issues?		X	
Specify the countries involved:(Maximum number of characters allowed: 1000)			
Do you plan to use local resources (e.g. animal and/or human tissue samples, genetic material, live animals, human remains, materials of historical value, endangered fauna or flora samples, etc.)?		X	
Do you plan to import any material - including personal data - from non-EU countries into the EU?		X	
Specify material and countries involved: (Maximum number of characters allowed: 1000)			
Do you plan to export any material - including personal data - from the EU to non-EU countries?		X	
Specify material and countries involved: (Maximum number of characters allowed: 1000)			
In case your research involves low and/or lower middle income countries, are any benefits-sharing actions planned?		X	
Could the situation in the country put the individuals taking part in the research at risk?		X	
7. ENVIRONMENT & HEALTH and SAFETY	YES	NO	PAGE
Does your research involve the use of elements that may cause harm to the environment, to animals or plants?		X	
Does your research deal with endangered fauna and/or flora and/or protected areas?		X	

Does your research involve the use of elements that may cause harm to humans, including research staff		X	
8. DUAL USE	YES	NO	PAGE
Does your research involve dual-use items in the sense of Regulations 428/2009, or other items for which an authorisation is required?		X	
9. EXCLUSIVE FOCUS ON CIVIL APPLICATIONS	YES	NO	PAGE
Could your research raise concerns regarding the exclusive focus on civil applications?		X	
10. MISUSE	YES	NO	PAGE
Does your research have the potential for misuse of research results?		X	
11. OTHER ETHICS ISSUES	YES	NO	PAGE
Are there any other ethics issues that should be taken into consideration? Please specify		X	
Please specify: (Maximum number of characters allowed: 1000)			

I confirm that I have taken into account all ethics issues described above and that, if any ethics issues apply, I will complete the ethics self-assessment and attach the required documents.

YES	NO
X	

4. Call specific questions

Declarations on stage-2 changes

The full stage-2 proposal must be consistent with the short outline proposal submitted to the stage-1- in particular with respect to the proposal characteristics addressing the concepts of excellence and impact.

Are there substantial differences compared to the stage-1 proposal?

YES	NO
	X

If yes describe the changes:

Extended Open Research Data Pilot in Horizon 2020

If selected, applicants will by default participate in the Pilot on Open Research Data in Horizon 2020¹, which aims to improve and maximise access to and re-use of research data generated by actions.

However, participation in the Pilot is flexible in the sense that it does not mean that all research data needs to be open. After the action has started, participants will formulate a Data Management Plan (DMP), which should address the relevant aspects of making data FAIR – findable, accessible, interoperable and re-usable, including what data the project will generate, whether and how it will be made accessible for verification and re-use, and how it will be curated and preserved. Through this DMP projects can define certain datasets to remain closed according to the principle "as open as possible, as closed as necessary". A Data Management Plan does not have to be submitted at the proposal stage.

Furthermore, applicants also have the possibility to opt out of this Pilot completely at any stage (before or after the grant signature). In this case, applicants must indicate a reason for this choice (see options below).

Please note that participation in this Pilot does not constitute part of the evaluation process. Proposals will not be penalised for opting out.

We wish to opt out of the Pilot on Open Research Data in Horizon 2020.

YES	NO X
----------------	---------

If opting out please indicate the reason(s) for not being able to participate in the Pilot:

- the project does not generate any data
- to allow the protection of results (e.g. patenting)
- incompatibility with the need for confidentiality linked to security
- incompatibility with privacy/data protection
- achievement of the project's main aim would be jeopardised
- other legitimate reasons

Please specify the other legitimate reasons (max 300 characters)

Further guidance on open access and research data management is available on the participant portal: http://ec.europa.eu/research/participants/docs/h2020-funding-guide/cross-cutting-issues/open-access-dissemination_en.htm

¹ According to article 43.2 of Regulation (EU) No 1290/2013 of the European Parliament and of the Council, of 11 December 2013, laying down the rules for participation and dissemination in "Horizon 2020 – the Framework Programme for Research and Innovation (2014-2020)" and repealing Regulation (EC) No 1906/2006

The PRIMA programme is an Art. 185 initiative supported and funded under Horizon 2020, the European Union's Framework Programme for Research and Innovation'
